

Clever details

Adjustable screw holes to align the frame mount where you need it. The holes are spaced in accordance with wall framing standards.

Relocatable

Simple to remove or relocate in a 3 step process if required.

Pre-assembled

Stabilisers are pre-joined to the wall mount at the factory to make installation quick and simple.

Electronic drive assembly

Fully assembled, tested and set-up before leaving the factory. Just plug into power point.

Simple installation

2x wall mounting brackets that screws directly into wall structure. Mounting brackets adjustable to suit.

Heavy duty stabilisers

Heavy duty vertical stabilisers prevent the case from contacting the wall below when opening and closing, which means no marks on your wall.
